1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the prior applications from which priority is claimed.

2. It is unclear as to how priority is claimed from prior application 10/628,851, whether the application is a continuation, continuation in part or division of the prior application.

3. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the term "a airative" is unclear. It is also unclear as to how the perforated conduit communicates with the other structural elements claimed.

Claim 7 lacks antecedent basis for the catch net, and is unclear as to the location of the catch net.

In claim 8, it is unclear that the aeration device communicates with the sump or forms a return path. There is also no antecedent basis for the secondary pool, and it appears that there should be an "a" before the first recitation of the sump.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225

Art Unit: 1724

USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7, 9-11 and 14-17 of U.S. Patent No. 6,843,910. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims obviously comprise the subject matter recited by the patented claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All references from the priority patent have been made of record. Other references of interest include Niimi, Kickuth, Grove, Bates, Hosoya, Coffman, Hedberg, Ouwinga, Danner, Kerry, Japanese applications 58-70893 and 57-197089, German application 39 41 211, and PCT publication WO 96/16910.
